

Abstract

An injection molding which is produced from a molding composition comprising (A) 20 to 98.8 wt.% at least one polyester, (B) 1 to 60 wt.% material selected from the group
5 consisting of reinforcements and fillers, (C) 0.1 to 7 wt.% crystallization accelerator, (D) 1 to 60 wt.% at least one flame retardant selected among inorganic flame retardants, phosphorus-based flame retardants, and phenolic polymers,
10 and (E) 0.1 to 5 wt.% lubricant.
